

MULTICAL® 302

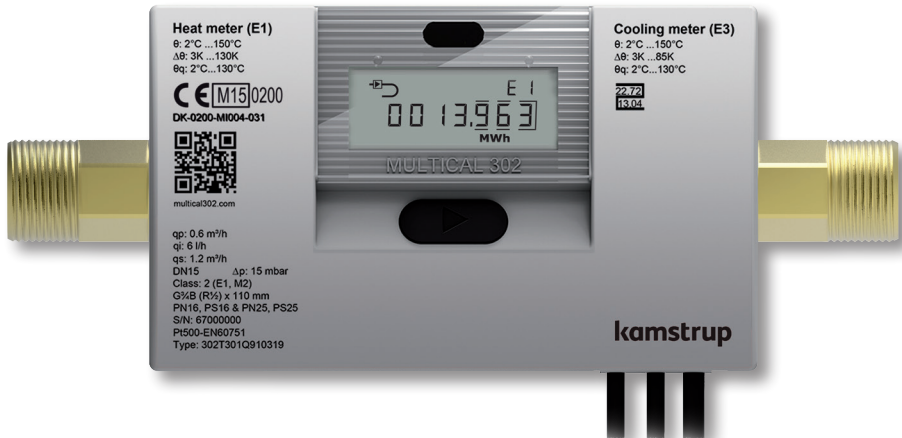

kamstrup

Facts Advantages Benefits

The compact heat and cooling meter for the housing industry

MULTICAL® 302

Fact	Advantage	Benefit
Inlet/Outlet position, energy unit and much more can be configured on-site	One meter to fit all installations	Low stock holding and easy planning
PN25 metal flow sensor approved to 130°C	Ruggedized construction, also for high buildings and direct connected district heating	Highest flexibility without any extra effort or expense
Dynamic range 1:1600 from start- to saturation flow (1:250 from qi:qp)	It measures every thinkable consumption	Reduced loss of distributed energy
Low pressure loss, below 0.1 bar	Lower the need for pumping capacity	Reduced amount of electrical energy to the circulation pumps in the utility
Built-in data logger for 960 hours, 460 days, 24 months and 15 years	Diversity of information for the billing, energy and diagnostic efficiency	Faster fault findings and best back-ground for the energy efficiency consult
No transport restrictions on the batteries	The batteries are declared exempt from the Dangerous goods regulations	Faster and more economical transport
Heat, Cooling or combined Heat/Cooling meter	The meter fits all thermal applications	Low stock holding and easy planning
The small and compact meter can be turned and still stay within narrow dimensions	Easy to adjust to the optimum display angle in e.g. residential applications	Best display readability in all applications and a minimum of time for installation

MULTICAL® 302

Our ultrasonic metering solution – your **ultra**strong partner

Kamstrup is a world leading manufacturer of system solutions for smart energy and water metering.

Our core areas are measurement of heat, cooling, water, electricity and gas.

Furthermore, in co-operation with you we develop AMR and service solutions that are customised for your company.

We are represented in more than 60 countries worldwide by Kamstrup sales and subsidiary offices or by our distributors.

All employees work hard to offer your company the very best service and to respond to global market information provided by our trusted partners.

In this way we maintain a strong mutual co-operation.

The Kamstrup brand

– when you demand quality, reliability, innovation and partnership.

Think forward
